ReSolve

HPLC Mobile Phase Recycler

Reduce waste. Lower emissions. Maintain GMP compliance.

ReSolve intelligently recycles uncontaminated mobile phase between peaks, helping laboratories reduce solvent consumption, cut disposal volumes and support GMP-compliant operation without compromising data integrity.

>90% Mobile phase recycled

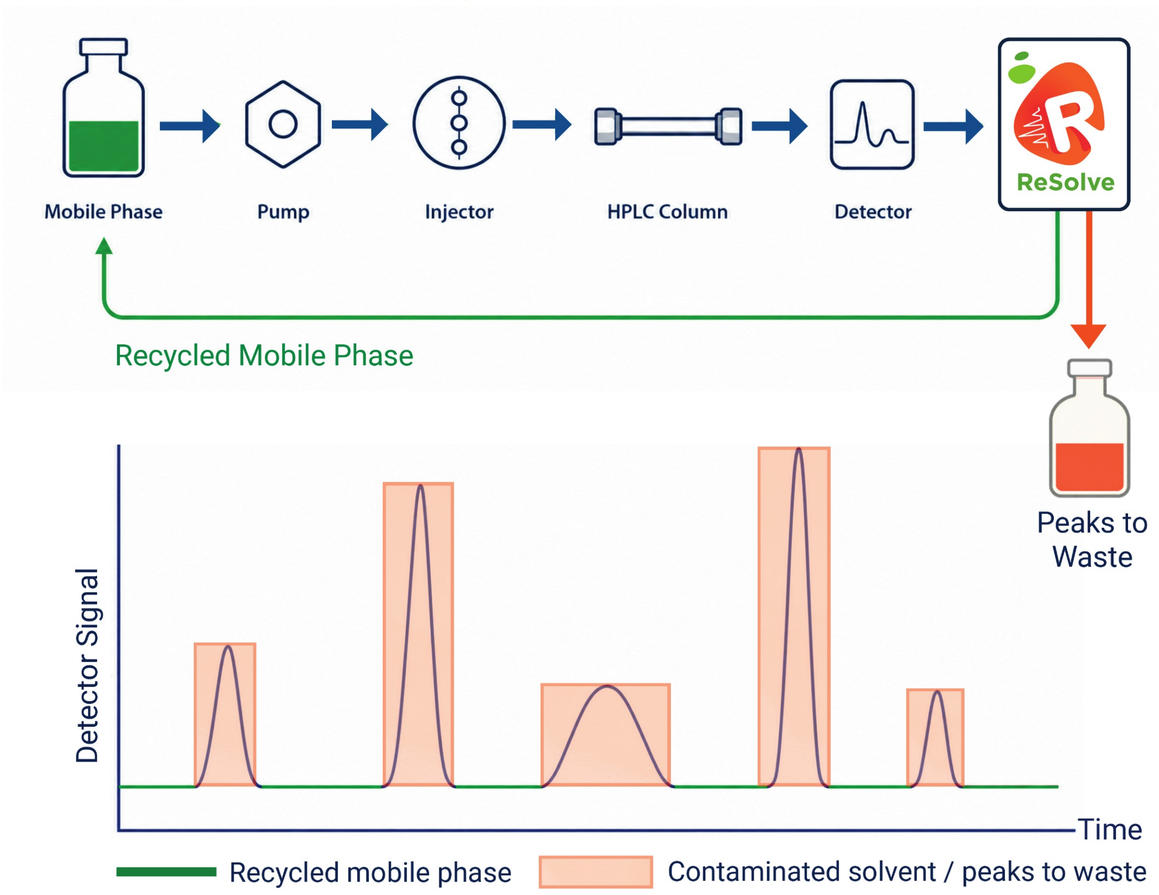

Reduce solvent waste and disposal costs

Lower environmental impact and carbon emissions

Integrates with all HPLC systems

How ReSolve Works

ReSolve monitors the HPLC detector signal in real time. Eluting peaks are diverted to waste, while uncontaminated mobile phase between peaks is returned to the reservoir.

Key Features

GMP COMPLIANT

21 CFR Part 11 compliant.
Audit Trail of waste and recycle events.

REAL-TIME MONITORING

4-inch touchscreen displays live chromatogram and system status.

UNIVERSAL COMPATIBILITY

Operates with all HPLC systems and detectors

NO BENCH SPACE REQUIRED

Touchscreen mounts to front or side.
Valve mounts to rear of detector.

FLEXIBLE MODES

Full GMP mode for regulated laboratories or basic mode for research.

Typical Savings per HPLC*

Solvent reduction	CO_2e reduction	Waste disposal reduction
>90% of mobile phase recycled	**0.5 - 2.0** tonnes of CO_2e per year	**200 - 350L** per year

**Actual savings vary by method, flow rate, solvent usage and costs.*

Typical ROI per HPLC*

Annual Solvent Cost	€12,000
Solvent reduction with ReSolve	90%
Annual solvent savings	€10,800
Waste disposal savings	€1,500
Total annual savings	€12,300

Typical payback period 3-6 months

Built for GMP. Designed for confidence.

- 21 CFR Part 11 Compliant
- IQ/OQ/PQ Documentation
- Secure user roles & electric signature
- Audit trail with PDF/CSV imports
- Data integrity ALCOA+

Good for your lab. Great for our planet.
